Title: Innovative Romanian textile company based on development of patterns and prototypes, and production of new fabrics or innovative textile products offers manufacturing or outsourcing agreements

POD Reference: BORO20210615001

Summary: A Romanian company operates in the textile industry. Based on know how in product development and industrialization, the company is looking for partners that would require their services under outsourcing or manufacturing agreements. The company can offer full services, being able to manage the entire production flow - from product development to manufacturing and logistics. Skilled workers and technology allow the company to supply a high quality product in a short time.

Description:

The Romanian company is a family-owned business founded in 2007. Today is a textile SME with a capacity of manufacturing under high standards, with well-qualified staff and the latest equipment and technology in sewing and cutting. The company's premises are located in Ploiesti, just 45km north of Bucharest International Airport.

The Romanian company is a textile manufacturer working for several sectors requiring textile applications: fashion, technical, industrial and protections fabrics, travel, sports, medical, automotive, aerospace, naval, wearable textiles.

The company is offering full textile services, the business being based on developing patterns and taking care of the production by outsourcing it from collaborators. A lot has been invested in having the latest technology available and proficiently trained workers. The production takes place in the company own factory, being able to deliver even small orders quicker and at a higher quality than before.

The company is distinguished by most of the Romanian companies, which are used to produce big orders in Lohn. The company is working straight for the client, with the client, in small orders, from the customers concept, through the development of the product till the delivery.

The added value that the company offer is: faster delivery; flexibility; higher quality and the ability to put the creativity and partnering with clients to obtain a suitable product.

The company, already active in international markets, looks for international partners requiring innovation in fabrics and textile manufacturing solutions for any field of application and for any type of article. In particular, the advice offered by the company can cover all stages of product development:

Specialized consulting services will be provided under outsourcing agreements.

The company can also offer manufacturing agreements for the production of prototypes and/or the production of short/medium-sized series to test new textile developments (products and/or fabrics).

Advantages and Innovations:

Being on the textile field, since 2007, the company achieved the experience that give today the possibility to manage each step on production flow.

The company offers customised services and products, close cooperation, creativity, design, know-how, high-tech standards.

The structure is adapted to small quantities, small orders. The company do not request minima, being able to produce both 1 pcs and 200 pcs.

A territorial advance is the location near Bucharest airport (just 45 km away), which allows customers to easily come to the factory.

Stage of Development:

Already on the market
