General Information

Short summary

This Polish manufacturer of special machine tools and devices used mainly for the maintenance and renovation of rail vehicles, is looking for supplier, able to manufacture specific components of these machines. Possible cooperation would take the form of an agreement with the supplier in accordance with the technical documentation provided by the Polish company. Potential partners can be both manufacturers and companies providing machining services.

Full description

This Polish company is a manufacturer with over 20 years of experience, specializing in equipment for the maintenance and renovation of railway vehicles, i.e. underfloor wheel lathes, modern above floor wheel lathes, drilling machines WDL series, diagnostic stations for the diagnosis of railway wheels, rail shunters, rope winching devices, ring rolling machines. These products are known almost all over the world thanks to the efficiently functioning network of foreign distributors which the company has been building for many years.

Currently, the company wants to focus on establishing contacts with potential suppliers of components for the offered

machines and devices. These include: machine bodies, housings, motors, gears, cables, software, etc. Potential partners can be companies from the area of CNC machining, welding, cutting, bending and technological processing (electroplating, hardening, annealing, painting), as well as producers of electronics, automation, pneumatics, or peripheral devices related to the production of machines intended for maintenance and renovation rail vehicles. The company is interested in contractual cooperation with the supplier, providing detailed technical specifications and other criteria.

Advantages and innovations

Technical specification or expertise sought

The technical specification for the implementation of a specific order will be provided to the supplier.
