General Information

Short summary

Slovak IT company active in the field of telemedicine offers telemon – Remote Patient Monitoring (platform for telemedicine care). The SME is looking for strategic - exclusive sales partner or joint venture partner in EU and offers Commercial agreement with technical assistance or Investment agreement.

Full description

Slovak IT company has been operating on the Slovak market since 2000. The company's goal is to provide reliable, robust and flexible solutions that will help their clients and partners in managing business processes and meet their expectations in the field of information technology development. The company developed the core and innovative solution for Remote Patient Monitoring called telemon (telemon platform - remote patient monitoring system for telemedicine). telemon personal is universal mobile app for chronic disease management including diabetes, cardiovascular disease, COPD, cancer, hypertension, long covid, after surgery and others.

Better monitoring, better health. It provides to clients:

- track vitals using any medical devices
- monitor any chronic disease
- set reminders for medication, diet and measurements
- share health data with the doctor

- fewer in person visits, save time and money, mitigate reinfections
- provides clients with the confidence that the early warning system will alert medical staff
- empowered Microsoft Teams video call by telemon personal Teams app.

The SME is looking for strategic - exclusive sales partner or joint venture partner in whole EU and offers Commercial agreement with technical assistance or Investment agreement.

Advantages and innovations

- Universal native mobile application for Apple and Android
- Integrated smart medical devices from leading manufacturers available worldwide (Amazon or BYOD)
- Monitoring any chronic disease (personalized monitoring plan)
- Reminders for medication, diet and measurements
- Sharing health data with your doctor
- Simplified interpretations for patients, trends and benchmarks
- Fewer in-person visits, save time and money, mitigate
- To be confident as early warning system alerts medical staff
- MDR certification
