## General Information

### Short summary

A Swedish company, having a goal/vision to be the most sustainable printing company in Sweden. They are looking for a partner who can help them to develop their idea about taking advantage of wastepaper and turning it into a new material – cloth paper. They have their ideas about upcycling it into new products; cardboard for the construction industry, food packaging, or hygiene paper. They are looking for expertise and collaboration in materials based on paper and textile fiber.

### Full description

A Swedish company, an old printing company with a broad portfolio of printing services. The company has just set an ambition to become a leader in sustainability and also to be able to find a suitable circular service. In addition to the circular idea, the company will ISO certify itself within 9001 and 14001, among others. The basis of sustainability positioning is about insights into the world around us and that the company has x kg of waste material/year in the paper if you start looking at what can be done with paper waste.

The company is now looking for collaboration with someone with manufacturing licenses to make something of the residual products, i.e., waste material in the form of paper.

They are looking for collaborations within three areas;

1. Building material – rag
2. Food trays
3. Hygiene paper

### Advantages and innovations

### Technical specification or expertise sought

They are looking for a partner who can help them to develop their idea about taking advantage of their waste paper and turning it into new material, for example, rags, and then upcycling it into new products. They have ideas for cardboard for the construction industry, food packaging, e.g., fast food, or hygiene paper such as handkerchiefs and toilet paper. They are looking for expertise and knowledge:

- in materials based on paper and textile fiber
- recipes and methods of production
- machines and manufacturing process
- new ideas

### Stage of development

**Already on the market**

IPR Status

### Sustainable Development goals

- **Goal 12: Responsible Consumption and Production**
